

Heat Pump Rebate

Rebate Checklist

In order to ensure timely approval and issuance of your rebate, please complete the following steps. Incomplete applications may result in delayed payment.

- Read the application Terms and Conditions to determine if you are eligible for a rebate under this program
- Complete this application form
- Attach the following documentation:
 - Itemized invoice including equipment manufacturer, model numbers, size or capacity, date of installation and installation address
 - AHRI Certificate of Product Ratings for the equipment installed (may be obtained from your contractor)
- Submit the application and required documentation to your local utility

Terms & Conditions

The Power Forward heat pump rebate program is provided by Heartland Energy in collaboration with your local municipal utility. Incentives are provided for the purchase of an ENERGY STAR rated electric air-source heat pump or geothermal heat pump.

- Customers of participating utilities served by Heartland Energy are eligible for rebates.
- Rebates are only available on ENERGY STAR models as outlined in this application, purchased and applied for in the current calendar year. Applications must be submitted by December 31, 2023.
- Rebates are available on a first-come, first-served basis and are subject to eligibility and availability of funds. This program is subject to change or termination without notice.
- A copy of proof of purchase/sales receipt must be included with this application and will not be returned.
- Rebates will be issued by your local electric utility in a manner chosen by the utility. Please allow up to 90 days for the delivery of rebates.
- Equipment must be new and installed by December 31, 2023. Old equipment (if applicable) must be properly removed and disposed of in order to be eligible for the rebate.

For a list of participating utilities, visit www.heartlandenergy.com or contact your local utility to verify participation.

Heating Seasonal Performance Factor (HSPF): A measure of a heat pump's energy efficiency over one heating season. It represents the total heating output of a heat pump (including supplementary electric heat) during the normal heating season (in Btu) as compared to the total electricity consumed (in watt-hours) during the same period.

Seasonal Energy Efficiency Ratio (SEER): A measure of equipment energy efficiency over the cooling season. It represents the total cooling of a central air conditioner or heat pump (in Btu) during the normal cooling season as compared to the total electric energy input (in watt-hours) consumed during the same period.

Coefficient of Performance (COP): A measure of efficiency in the heating mode that represents the ratio of total heating capacity to electrical energy input.

Energy Efficiency Ratio (EER): A measure of efficiency in the cooling mode that represents the ratio of total cooling capacity to electrical energy input.

Building Type

- Existing
- New Construction

Building Use

- Residential
- Commercial
- Small Business
- Multi-Family
- Industrial

Equipment Information

AIR-SOURCE HEAT PUMP - \$600

**Unit must be 2 tons or larger, minimum SEER Rating of 15 and minimum HSPF of 8.5*

Seasonal Energy Efficiency Ratio

Purchase Date

Condenser Unit Manufacturer

Model Number

Serial Number

Evaporator Coil (A-Coil) Manufacturer

Model Number

Serial Number

AIR-SOURCE HEAT PUMP WITH BACKUP ELECTRIC FURNACE OR BOILER - \$1,200

**Heat pump must be 2 tons or larger, minimum SEER Rating of 15 and minimum HSPF of 8.5*

Seasonal Energy Efficiency Ratio

Purchase Date

Condenser Unit Manufacturer

Model Number

Serial Number

Evaporator Coil (A-Coil) Manufacturer

Model Number

Serial Number

Furnace Manufacturer

Model Number

Serial Number

GEOHERMAL HEAT PUMP - \$1,200

Must be primary heating and cooling source

- Closed Loop Water to Air (Must have a minimum EER Rating of 17.1 and minimum COP of 3.6.)
- Closed Loop Water to Water (Must have a minimum EER Rating of 16.1 and minimum COP of 3.1.)
- Open Loop Water to Air (Must have a minimum EER Rating of 21.1 and minimum COP of 4.1.)
- Open Loop Water to Water (Must have a minimum EER Rating of 20.1 and minimum COP of 3.5.)
- Direct Geoexchange (Must have a minimum EER Rating of 16.0 and minimum COP of 3.6.)
